

M. SHARJEEL SALEEM

AI-Native Full-Stack Engineer | Generative AI & LLM Engineer | Prompt Engineer

+92 332 5760344 | sharry00010@gmail.com | [linkedin.com/in/msharjeelsaleem](https://www.linkedin.com/in/msharjeelsaleem) | muhammad-sharjeel-portfolio.netlify.app | Islamabad, Pakistan

PROFESSIONAL SUMMARY

AI-Native Full-Stack Engineer shipping production Generative AI, LLM, and agentic systems across web and mobile. Architect of prompt pipelines, RAG systems, and AI-driven automations using OpenAI GPT-4, Anthropic Claude, Cursor, and Claude Code, accelerating delivery timelines by up to 40%. Strong Python + TypeScript foundations with deep prompt engineering, RAG, and computer vision (YOLO v8) skills.

CORE SKILLS

Generative AI & LLMs: Large Language Models (LLMs), Generative AI, RAG, Agentic AI Workflows, Multi-modal AI, Vector Embeddings, Fine-Tuning, MCP

Prompt Engineering: Chain-of-Thought, Few-Shot, Tool/Function Calling, Structured Outputs, Guardrails, Eval & Benchmarking

AI Platforms & APIs: OpenAI GPT-4/4o, Anthropic Claude, Hugging Face, LangChain, LlamaIndex, Pinecone, ChromaDB, Pydantic AI, n8n

Languages & Frameworks: Python, TypeScript, JavaScript, SQL · Next.js, React, React Native, FastAPI, Node.js, Streamlit, Tailwind

ML / Computer Vision: PyTorch, TensorFlow, OpenCV, YOLO v8, NumPy, Pandas, scikit-learn, NLP

Data & DevOps: MySQL, PostgreSQL, Supabase, Git, GitHub Actions, CI/CD, Docker, Vercel, Netlify

AI Dev Tools: Cursor, Claude Code, Trae AI, GitHub Copilot, ChatGPT, Bolt, v0

PROFESSIONAL EXPERIENCE

Sideline Technologies | Remote | *Full-Stack AI Prompt Engineer*

Jun 2025 – Present

- Architect and ship cross-platform mobile (iOS/Android) and web apps powered by OpenAI GPT-4 and Anthropic Claude, using Cursor, Claude Code, and Trae AI to compress delivery timelines by ~40%.
- Designed agentic LLM pipelines with structured outputs, tool/function calling, and Supabase-backed retrieval, turning unstructured inputs into schema-validated actions.
- Lead prompt engineering enablement for a 5+ person team, driving ~30% productivity gains via standardized prompt patterns, eval harnesses, and AI-assisted dev workflows.

ReactiveSpace | Remote | *Prompt Engineer*

Apr 2025 – May 2025

- Built the Kani Framework Application (Next.js, TypeScript, React, Tailwind CSS) integrated with Cursor AI for rapid AI-assisted feature delivery.
- Developed an NLP-driven outbound chatbot orchestrated via prompt chains, automating client communication flows and lead qualification.

Dataventiv | United States (Remote) | *Python Developer (Intern)*

Jul 2024 – Sep 2024

- Engineered a Python Modbus simulator that eliminated hardware dependency for QA, cutting test setup time ~50% and enabling 3x faster automation iteration.
- Built SCADA dashboards in Ignition Perspective for real-time monitoring of 10+ industrial data streams; shipped 4 new UI features improving operator usability.

FEATURED PROJECTS

Autopilot Pro – AI-Powered Road Safety System — Python, YOLO v8, OpenCV, Deep Learning

- End-to-end driver-assistance system performing real-time traffic-sign interpretation, signal recognition, pedestrian detection, and LTV/HTV vehicle classification on live video; trained YOLO v8 on a custom-curated dataset for high-accuracy multi-class detection.

DocuChat AI – Chat with Documents (RAG) — Python, OpenAI GPT-4, LangChain, Vector Embeddings, Streamlit

- Built a Retrieval-Augmented Generation pipeline that ingests PDFs, chunks/embeds content into a vector store, and serves grounded answers with cited sources; guardrailed prompts and structured outputs minimize hallucinations.

HealthScribe AI – Clinical Note Generator — Python, OpenAI GPT-4, Speech-to-Text, FastAPI, React

- LLM-powered clinical scribing app that converts patient-clinician conversations into structured SOAP notes; Pydantic-validated outputs and PHI-redaction prompts keep documentation consistent and compliant.

CodeSentinel AI – AI-Powered Code Analysis — TypeScript, Node.js, Anthropic Claude, GitHub Actions

- AI code-review assistant analyzing pull requests for security issues, anti-patterns, and complexity hotspots via tuned Claude prompts; runs as a GitHub Action posting inline review comments to cut human review turnaround.

EDUCATION

Bachelor of Software Engineering · *Foundation University, Islamabad*

2021 – 2025 | CGPA: 3.41 / 4.0

Relevant Coursework: Machine Learning, Software Design & Architecture, Database Management Systems, Software Re-Engineering.
